

## Bercow: Ten Years On

### Finding out about help for children's communication difficulties

#### What is the report all about?

Children need to talk, listen and understand so they can do well in school and make friends.

Talking, listening and understanding are hard for lots of children.

These children do not get enough help.

"I should have speech and language therapy, but it never happens."

#### We asked lots of questions.....

We asked people about talking, listening and understanding.

We asked them about the help children get. Then we wrote a report.

#### People told us....

Help is not good enough

**speaking and listening is important**

There is not enough speech and language therapy

There's help in the school down the road, but not in my school

Nobody noticed my son had speech and language difficulties

#### What can you do?

Tell your teacher about this report.

Tell your teacher what helps you the most.
